PAPER NO. 13

### DETAILED ACTION

1. Applicant's election with traverse of the species CD40L / soluble CD40L as the CD40 binding agent and CD30L as the additional agent in Paper No. 8 has been acknowledged.

Applicant's election with traverse of Group I, claims 1-19 in Paper No. 11, filed 2/21/03 is acknowledged. Although applicant notes the coextensive nature of certain claimed limitations, the distinctions between Groups I and II does not rely upon the additional step of obtaining hemopoietic cells and, in turn, dendritic cells in Groups II, which does not appear in Group I.

Applicant may considering providing evidence or identifying such evidence now of record showing that Groups I and II are obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

2. This application contains claims directed to the following patentably distinct species of the claimed Inventions: wherein the tumor or precancerous cells (see page 3, paragraph 3 and page 12, paragraph 2 of the instant specification) are:

- A) B cell lymphomas which express CD40,
- B) melanomas which express CD40,
- C) sarcomas which express CD40,
- D) T cell lymphomas / leukemias which do not express CD40,
- E) connective tissue tumors which do not express CD40,
- F) neuroblastomas which do not express CD40 or
- G) one of the tumors or precancerous cells disclosed on page 3, paragraph 3 of the specification.

These species are distinct because their etiologies and therapeutic endpoints differ.

Applicant is required to select one distinctive tumor or precancerous cell type.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic, for example.

5. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Serial No. 09/842745  
Art Unit 1644

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

6. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phillip Gambel whose telephone number is (703) 308-3997. The examiner can normally be reached Monday through Thursday from 7:30 am to 6:00 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (703) 308-3973. Any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1600 receptionist whose telephone number is (703) 308-0196.

Papers related to this application may be submitted to Technology Center 1600 by facsimile transmission. Papers should be faxed to Technology Center 1600 via the PTO Fax Center located in Crystal Mall 1. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). The CM1 Fax Center telephone number is (703) 305-3014.
